

# Fresh through the day with "Miss Perfect"

The 'Form & Funktion' range from Fräulein Perfekt, extended figure-shaping models that can be seen on the knowledge of modern women and skillfully stage their curves. Depending on the model position, the understanding increases by up to one size, of course with constant freedom of movement.

The seamless styles of body with molded multicups and molded shirt, high briefs and trousers with legs have always been among the bestsellers in this segment of the brand. For summer 2019, Apparel Partners, who sell this in-house label worldwide, are now announcing - in the true sense of the word - cool news: While previously only the high slip was made from the performance fiber Nilit-Breeze, it is now all four Models that, by the way, all have very fine edges without an additional elastic band. Miss Perfect puts an end to the prejudice of restricting and sweaty shapewear!

The advantages are obvious or - in this case more likely - on the skin: The high-tech goods ensure that the wearer feels fresh even in warm and hot temperatures, as the material offers a cooling ventilation effect and high breathability. This regulates body temperature and guarantees a sense of wellbeing - and freedom of movement too, of course. The best thing about it: The function is permanent, no matter how many washes, it doesn't change anything. Further advantages of the easy-care material are its soft feel and the associated comfort. A hang tag at the POS makes the advantages of these Miss Perfect styles recognizable for the end user.

A word about the technical refinements that ensure a 'perfect curve position': the body and shirt (both available from October) as well as the briefs (available from stock) have a sculpting stomach area. In addition, the breasts and bottom are lifted and shaped by shaping, supporting molding. The body also has a super soft crotch fastener for comfort, the shirt has adjustable straps, and the lower parts have soft leg cuffs with high elasticity. In terms of color, there is a choice between skin and black, the sizes range from S to 2XL (38-46).

With these 'Form & Function' styles from Miss Perfect, summer can come, especially since they all contain a high level of UV protection!
